| 3 Multiuse area | 7 Path | 11 Boco river |
| 4 Playground | 8 Wooden walkway | 12 Marshland |

"Quinta do Ega" is part of a whole natural landscape where the existence of Boco River brings a poetic image to this place. The Boco River, especially the biodiversity of its surrounding marshland, it is also very important to the economic, cultural and social structure of Vagos municipality.

"Quinta do Ega" "naturally" joins the population to the Boco's riverbanks and surroundings. This "garden" slowly disappears in the colorful landscape; therefore the recreational needs and contemplative moments must coexist with the environmental awareness by observing and appreciating the here existing flora and fauna.

Thus, in "Quinta do Ega" you can find recreational and play areas, as well as contemplation and educational places.
